UCIP Comments: 06/30/2016 Same as last inspection. Good candidate for removal via DWR's Deferred Maintenence Program. Pipe used to drain pastureland which have since been converted to rice fields that drain on opposite side of fields, rendering the drainage function of this pipe obsolete. This pipe is not needed and causes nuisance flooding at high water on landside (LS) per Tom Engler of MBK. As such, operation of flapgate is still blocked via a post at WS end. Pipe is sleeved but sleeve has grossly detereorated. LS end of pipe appears bent. (K. Fazel - UCIP)03/25/2013 Pipe heavily corroded and damaged. 8-inch PVC pipe runs through pipe/possibly for irrigation. CMP heavily rusted on WS toe and debris blocking flap gate on WS toe. (G. Wylie - FPIIB) FIELD\_STRUCT\_DESC: \*ABANDONED\* 20-inch corrugated metal gravity drainage pipe through the levee, 16.5 feet below the crown. 8inch polyvinyl chloride (PVC) pipe sleeved through the 20-inch corrugated metal pipe with the annular space left void. FS Date: 6/30/2016 9:06:00 AM

UCIP Comments: 06/30/2016 Same as last inspection. Good candidate for removal via DWR's Deferred Maintenence Program. Pipe used to drain pastureland which have since been converted to rice fields that drain on opposite side of fields, rendering the drainage function of this pipe obsolete. This pipe is not needed and causes nuisance flooding at high water on landside (LS) per Tom Engler of MBK. As such, operation of flapgate is still blocked via a post at WS end. Pipe is sleeved but sleeve has grossly detereorated. LS end of pipe appears bent. (K. Fazel - UCIP)03/25/2013 Pipe heavily corroded and damaged. 8-inch PVC pipe runs through pipe/possibly for irrigation. CMP heavily rusted on WS toe and debris blocking flap gate on WS toe. (G. Wylie - FPIIB) FIELD\_STRUCT\_DESC: \*ABANDONED\* 20-inch corrugated metal gravity drainage pipe through the levee, 16.5 feet below the crown. 8inch polyvinyl chloride (PVC) pipe sleeved through the 20-inch corrugated metal pipe with the annular space left void.
